Course Overview

This course is designed to strengthen and develop participants’ knowledge and skills by providing them with in-depth and advanced knowledge, psychological and social skills and interventions for people who experience psychosis or related experiences. Each element of the strand provides the student with an option of including a clinical dimension for advanced practice requirements.

Structure and delivery

**Year One:** commences with a full week in September and thereafter one or two days per week for the remainder of the academic year (depending on whether the course is being undertaken full-time or part-time).

**Year Two:** attendance at workshops throughout the academic year.

A blended learning approach is utilised in the delivery of theoretical content which includes lectures, group discussions and self-directed learning. The assessment process is a combination of written and practical assignments.
